

AUTONOMOUS NUCLEUS

“LOS INCONTROLADOS”

Red & Anarchist Action Network (RAAN)

Who Are We?

We are a network of response against the daily violence of the capitalist system. We opt for the autonomy of the exploited in action and organization as opposed to in the parties, unions, and “official associations” that make up the system and nourish it through their operations.

Why?

Because capitalism is a system based in the exploitation of other people’s labor, it generates social classes and converts us into subconscious participants in this exploitation. For example, when we consume at GAP or IKEA we contribute to the maintenance of an economic structure that disguises its brutality under a false discourse of development.

In order to defend such a system the State – as the marionette of the rich – reprimands all of its opponents either directly through repression, torture and criminalization, or indirectly by the consolidation of the means of communication, public space, and education.

Towards What End?

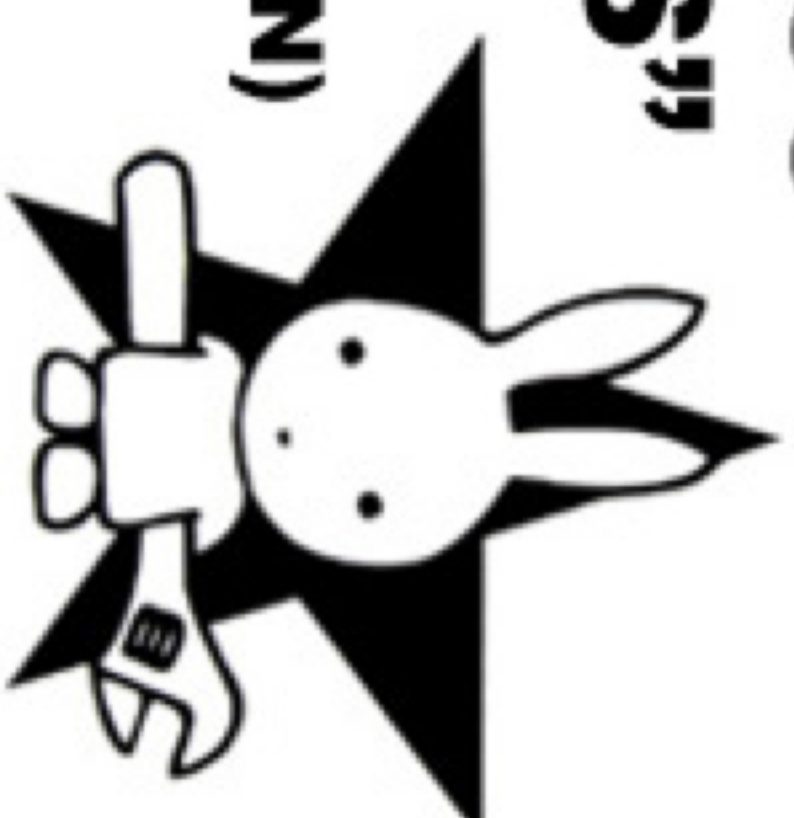

Faced with this reality, we wish neither to generate pity nor fall into a victimist discourse: for that there are the Democrats and the AFL-CIO. What we want is to create the social pressures necessary for a revolution that destroys – from the roots – this society, governed by oppression and the oligarchy, to construct atop its ashes a cradle of cooperation and mutual respect.

HOW LONG WILL WE KEEP WORKING FOR THEM?
